

AMENDMENTS TO THE SPECIFICATION:

Please amend the specification as follows:

Please replace the paragraph at page 17, lines 13-19 with the following new paragraph:

--The pressure switch 55 is operatively connected to pressure regulator 29, which controls the air pressure in the second actuator 27. Pressure regulator 29 is capable of supplying air to the second actuator 27 at at least two controlled pressures, the reference pressure output by regulator being selected (e.g., using control element 131 associated with pressure regulator 29) in accordance with the air pressure sensed by the pressure switch 55.--
